**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 1T, 453 O.G. 213.

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Invention drawn to an input device such as a touchscreen display or a scanner to acquire data patterns, symbols, or configurations associates to claims 4-10, classified in class 463, subclass 6.
- II. Invention drawn to a canister or a media cartridge containing unprinted wallpaper web associates to claims 12 and 31, classified in class 400, subclass 617.
- III. Invention drawn to a core or a tote for winding printed wallpaper web associates to claims 13, 15, 32, 43, and 46, classified in class 400, subclass 691.
- IV. Invention drawn to a cutter for cutting the printed wallpaper web associates to claims 3, 14, and 33, classified in class 347, subclass 157.
- V. Invention drawn to a dryer for drying printed wallpaper web associates to claims 17, 35, and 42, classified in class 347, subclass 102.
- VI. Invention drawn to an ink jet printhead in an ink jet assembly to ejecting ink droplets to form images on the wallpaper associates to claims 20-29, 44-45, and 47, classified in class 347, subclass 54.
- VII. Invention drawn to a slitting mechanism for slitting the wallpaper web to a selected width associates to claims 2, 11, and 34, classified in class 242, subclass 530.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-VII are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the

Art Unit: 2853

instant case, each subcombination as clearly shown above does not "overlap in scope and are not obvious variants" and having separate utility; for example, such drying system can be used for ironing and drying printed newspaper or fabric, or produced plastic film, such ink jet printhead can be used to form a pattern in manufacturing a color filter, such media cartridge or canister and slitting mechanism can be used in cutting and sorting paper or fabric manufacture, such core and tote can be used for winding roll of plastic film, and such input device, touchscreen video display, for example, can be used as means for customer interface with a banking system. See MPEP § 806.05(d). Claims 1, 16, 18-19, 30, 36-41, and 48 are generic.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification and their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species/subcombination or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In

either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LAM S. NGUYEN whose telephone number is (571)272-2151. The examiner can normally be reached on 7:00AM - 3:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, STEPHEN D. MEIER can be reached on (571)272-2149. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
